Dear Mr. Lake:

I am writing to voice my objection to United States participation in an agreement withholding information about the food we eat.

All genetically engineered food should be labeled, the American public has the right to choose & this should not be taken away. I am specifically concerned about the use of ^{both potentially dangerous} Bt & Irradiated food -

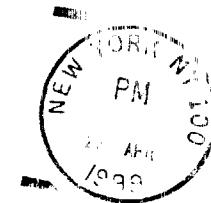

What you choose to do about this issue will not only effect the health & lives of our citizens, but you & your loved ones as well C 122

Please do the right thing!

Sincerely,
Judith K. Livingston
